OBJECTIVE

Experienced Full-stack Software Developer with 3 years of hands-on experience building scalable web apps. Proficient in **ReactJS, NodeJS and Java** adept at delivering innovative solutions within agile environments.

EXPERIENCE

Radiant Sage Ventures June 2024 – Present
Role: Research & Development Engineer Remote

- Leading development of a **DICOM-based** medical image viewer supporting multi-modality image rendering and advanced annotation tools including Freehand ROI, Redact, Ellipse, Length, Bidirectional, and ClosedPath for clinical trial analysis.
- Implemented annotation persistence, **versioning**, layout customization, and real-time updates to allow the radiologist to mark, track, and manage target lesions efficiently.
- Debugged and resolved high-priority production incidents through root-cause analysis, managed **patch releases** and production **deployments**, conducted **code reviews**, and ensured reliable delivery of new features and critical bug fixes across environments.
- Identified the need for centralized production error monitoring and took ownership of **GlitchTip** setup and integration, driving its adoption across the team to improve real-time error tracking, debugging efficiency, and visibility of production issues.
- **Tech Stack**: **Spring Boot**, **ReactJS**, **Tailwind CSS**, **PostgreSQL**, **GlitchTip**, Git, Bitbucket, Jira.

SproutsAI July 2024 – May 2025
Role: Consultant Software Engineer Remote

- Led development of key modules including **Job Generation**, **Email Sequencing**, **Candidate and Prospect Management**, **Analytics Module** and **Referral Services**, enabling seamless hiring workflows and approval processes.
- Implemented **Resume Parsing**, **auto-sourcing**, and a **Scoring Engine** to automate candidate matching and ranking, significantly reducing manual recruiter effort.
- Collaborated with clients (**MIPS**, **TailorBird**, **Tech Mahindra**) to gather product requirements, improve usability, and continuously iterate based on feedback.
- **Tech Stack**: **Node.js**, **React.js**, **Tailwind CSS**, **MongoDB**, **Jest**, Git, Jira.

Interra Information Technology January 2023 – July 2024
Role: Member Of Technical Staff - L4 Kolkata, West Bengal

- Contributed to the **Job Crafting Tool** project for universities such as the University of Colorado and the University of Michigan. Employed technologies such as **Spring MVC, SpineJS, Shopify, MySQL, and AWS**. Responsibilities encompassed adding new functionality, deploying the application on AWS, resolving bugs, and conducting code reviews.
- Managed the InterraIT website, performing tasks such as adding new sections to existing pages, creating new pages, posting job openings, and publishing new blogs using **Drupal (PHP)** and **ReactJS**.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript
Backend Technologies: NodeJS, Spring MVC, Spring Boot, ActiveMQ, Drupal
Frontend Technologies: ReactJS, NextJS, Angular, HTML, CSS, Tailwind
DataBase: MySQL, MongoDB, PostgreSQL
Developer Tools: Git, GitHub, Bitbucket, GitLab, Spring Tool Suite, Postman, Docker, N8N, AWS

PROJECTS

Spatio-Temporal Change Detection of Urbanization | Python, Image Processing

- **Final Year Project:** Analyzed urban expansion in **Newtown, Kolkata** using satellite imagery and geospatial indexes (**NDBI, NDWI, NDVI**). Correlated urban growth with **electricity usage data** to assess infrastructure demands.
- Developed **Automated Image Processing Pipelines** to extract land-use patterns and applied **Machine Learning** for predictive analysis of future urbanization trends.

Recipe AI | React, TypeScript, NodeJS, Tailwind, gemini-2.0-flash Model, MongoDB

- Developed Recipe AI application with **OTP-based** authentication where users create recipes using AI prompts, save favorites, and manage their collection.
- Implemented secure recipe storage with CRUD operations and prompt-based generation, integrating **gemini-2.0-flash** API for intelligent recipe suggestions.
- Built a responsive React frontend for intuitive recipe management, featuring search, categorization, and cross-device accessibility.
- Implemented **React Error Boundaries** to gracefully handle runtime failures in production, ensuring no white screen is shown and improving reliability.

QuickBlog AI | React, JavaScript, Spring Boot, Tailwind, gemini-2.5-flash Model, MongoDB

- Developed Recipe AI application with **OTP-based** authentication where users create recipes using AI prompts, save favorites, and manage their collection.
- Implemented secure recipe storage with CRUD operations and prompt-based generation, integrating **gemini-2.0-flash** API for intelligent recipe suggestions.
- Built a responsive React frontend for intuitive recipe management, featuring search, categorization, and cross-device accessibility.
